DETERMINATION OF CUSTOMS VALUES OF CHEMICALS, METHYLENE CHLORIDE, PROPYLENE GLYCOL, SODIUM- BI –CARBONATE, MONO SODIUM GLUTAMATE, CALCIUM ACETATE AND CALCIUM PROPIONATE UNDER SECTION 25-A OF THE CUSTOMS ACT, 1969.

No .Misc./14/2009-II

Dated: 06-10-2016

(VALUATION RULING NO. 948/2016)

In exercise of powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Chemicals namely Methylene Chloride, Propylene Glycol, Sodium Bi Carbonate, Calcium Acetate, Calcium propionate and Mono Sodium Glutamate are determined as follows:

2. Background of the valuation issue: The custom values of the subject Chemicals namely Methylene Chloride, Propylene Glycol, Sodium Bi Carbonate, Calcium Acetate, Calcium propionate and Mono Sodium Glutamate were earlier determined vide Valuation Ruling Nos 804/2016 dated 22.01.2016, 805/2016 dated 22.01.2016, 820/2016 dated 08.03.2016 and 823/2016 dated 24.03.2016. There were several representations from different importers/ traders and trade bodies i.e. Pakistan Chemicals and Dyes Merchants Association (PCDMA), for determination of customs value of the chemicals. More over the importers have claimed that the prices of subject chemicals are showing down ward trend in the International market hence existing valuation ruling, which is over seven months old is required to be revised in the light of honorable High Court of Sind, at Karachi's orders dated 10.11.2015 in Constitutional Petition No. D- 6918/2015. Since 90 days have passed and a number of representations were received from commercial importers and multi-national companies regarding values determined in afore mentioned valuation rulings, hence an exercise was initiated to re-determine the values of subject chemicals.

3. Stakeholders' participation in determination of Customs values: Meeting with all the stakeholders including importers, trade bodies i.e. Pakistan Chemicals and Dyes Merchants Association (PCDMA) and representatives from clearance Collectorates, was held on 07.9.2016 to discuss the current international prices of the subject chemicals The view point of all participants was heard in detail and considered to arrive at Customs value for subject Chemicals.

4. Method adopted to determine Customs values: Valuation methods provided in Section 25 of the Customs Act, 1969 were duly applied in their regular sequential order to address the particular valuation issue at hand. The transaction value method as provided in Sub-Section (1) of Section 25, found inapplicable in light of the wide variety of invoices submitted at import stage the veracity of which could not be ascertained fully, hence requisite information required

under law was not available to arrive at the correct transaction value. Identical / similar goods value method provided vide Sub-Sections (5) & (6) of Section 25 *ibid* were examined for applicability to determine Customs value of subject goods, this data provided some references, however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the Customs Act, 1969, however, it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and international prices through Web were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject good. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of the Chemicals.

5. Customs values for Chemicals namely Methylene Chloride, Propylene Glycol, Sodium Bi Carbonate Calcium Acetate, Calcium propionate and Mono Sodium Glutamate; The Chemicals namely Methylene Chloride, Propylene Glycol, Sodium Bi Carbonate, Calcium Acetate, Calcium propionate and Mono Sodium Glutamate *hereinafter specified* shall be assessed to duty / taxes at the following Customs Values :-
