Determination of Customs Values of Ring Travelers Under Section 25-A of the Customs Act, 1969

(VALUATION RULING NO. 959/2016)

No. Misc/25/2016-VII 19760

Dated: November 04, 2016

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Ring Travelers are determined as follows: -

2. **Background of the valuation issue:** Customs values of Ring Travelers were determined under Section 25A of the Customs Act, 1969, vide Valuation Ruling No.400/2011, dated 25-11-2011. The Valuation Ruling required revision in line with the prevailing prices in the international market. Therefore, this Directorate General initiated an exercise for determination of customs values of Ring Travelers.

3 **Stakeholders' participation in determination of Customs values:** Different meetings with stakeholders were held and a final meeting was held on 21-07-2016. Importers had been requested to furnish the following documents before or during the course of meeting:

- A. Invoices of imports during last three months showing factual value.
- B. Websites, names and E-mail addresses of known foreign manufacturers of the item in question through which the actual current value can be ascertained.
- C. Copies of Contracts made / LCs opened during the last three months showing the value of item in question.
- D. Copies of Sales Tax Invoices issued during last four months showing the difference in price (excluding duty and taxes) to substantiate that the benefit of difference in price is passed on to the local buyers.

4. Certain importers submitted documents in support of their contentions claiming that their invoices and declarations were lower than the values determined in the ruling. Some importers pleaded that the ring travelers may be determined on lower side as the goods are being used in textile industry to promote exports. Ring travelers are used in textile mills around the world to process yarn. These products have a direct effect on the quality of yarn produced as their action physically turns the raw material into finished product. The importers wanted time to produce documents in support of their contentions, but they have not submitted the requisite documents except some import invoices. Resultantly numerous surveys were conducted for determination of the customs values.

5. **Method adopted to determine Customs values:** Valuation methods given in Section 25 of the Customs Act, 1969 were followed to arrive at customs values of different numbers/sizes of Ring Travelers. Transaction value method provided in Section 25 (1) was found inapplicable owing to wide variation in the values being declared to the customs. Identical / similar goods value methods provided in Section 25 (5) & (6) were examined for applicability to the valuation issue in the instant case which provided some reference values of the subject goods but the same could not be exclusively relied on due to wide variation in declared values of subject goods. Stakeholder's meetings were also scheduled but during the

meetings very divergent point of regarding international market prices was presented. Thereafter, market enquiry as envisaged under section 25(7) of the Customs Act, 1969, was conducted. For the purpose different markets were surveyed repeatedly. The computed value method as provided in Section 25(8) of the Customs Act, 1969, could not be applied as the conversion costs from constituent material at the country of export were not available. Online values of subject goods were also obtained. All the information so gathered was evaluated and analyzed for the purpose of determination of customs values. Consequently, the Customs values of Ring Travelers have been determined under Section 25(9) of the Customs Act, 1969.
