Determination of Customs Values of Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin.under Section 25-A of the Customs Act, 1969

No. Misc/ 26 /2017-II

Dated: 03 -05-2017

(VALUATION RULING NO. 1146 /2017)

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969. Customs values of Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin are determined as follows:-

2. **Background of the valuation issue:** The customs values of Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin is selected to determine the Customs values under section 25-A of Custom Act 1969 due to wide variation of declared and assessed values. Therefore to give level playing field to all importers, the Customs value of Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin are selected for determination and uniform application across the board to all.
3. **Stakeholders' participation in determination of Customs values:** Meeting with all the stakeholders including importers and representatives from clearance Collectorates, was held on 29-03-2017 and 12-04-2017, to discuss the current international prices of the subject item, representations received from commercial importers which are also examined in the light of PRAL data, and international websites. The view point of all participants was heard in detail and considered to arrive at Customs value of Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin.
4. **Method adopted to determine Customs values:** Valuation methods provided in Section 25 of the Customs Act, 1969 were duly applied in their regular sequential order to address the particular valuation issue at hand. The transaction value method as provided in Sub-Section (1) of Section 25, found inapplicable in light of the wide variety of invoices submitted at import stage the veracity of which could not be ascertained fully, hence requisite information required under law was not available to arrive at the correct transaction value. Identical / similar goods value method provided vide Sub-Sections (5) & (6) of Section 25 ibid were examined for

applicability to determine Customs value of subject goods, this data provided some references. however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the Customs Act, 1969, however, it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and international prices through Web were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject items. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of the Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin.

5. **Customs values for Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin:** *Phenolic Resin, Polyurethane Resin, Melamine Resin, Alkyd Resin and Epoxide Resin, hereinafter specified* shall be assessed to duty/taxes at the following Customs Values : -
