Determination of Customs Values of Circuit Breakers Under Section 25-A of the Customs Act, 1969

(Valuation Ruling No. 1166/ 2017)

No. Misc/11/2013-VII/1273

Dated: May 19, 2017

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Circuit Breakers are determined as follows: -

2. **Background of the valuation issue:** Customs values of Circuit Breakers were determined under Section 25A of the Customs Act, 1969, vide Valuation Ruling No.994/2016, dated 14-12-2016. Some representations were received for revision of Valuation Ruling owing to difference in prices of some brands and origins, which were not included in the said Valuation Ruling. The Valuation Ruling also required revision in line with the prevailing prices in the international market. Therefore, this Directorate General, in light of orders of superior courts in Danish Jehangir and Saadia Jabbar cases, initiated an exercise for determination of customs values of circuit breakers.

3 **Stakeholders' participation in determination of Customs values:** Meetings with stakeholders were held on 02-05-2017, 16-05-2017, and 17-05-2017. Importers had been requested to furnish the following documents before or during the course of the meeting:

- A. Invoices of imports during last three months showing factual value.
- B. Websites, names and E-mail addresses of known foreign manufacturers of the item in question through which the actual current value can be ascertained.
- C. Copies of Contracts made / LCs opened during the last three months showing the value of item in question.
- D. Copies of Sales Tax Invoices issued during last four months showing the difference in price (excluding duty and taxes) to substantiate that the benefit of difference in price is passed on to the local buyers.

4. The meetings were attended by different stakeholders. During the course of the meetings, some importers were of the view that the values of Circuit Breakers required revision as the difference in prices of different origins was more than actual, others claimed that there was no such difference. An importer from Sri Lanka origin objected that difference in determined Customs Values of China vis-à-vis Sri Lanka origin needed to be revised in line with market realities. Others were of the view that difference in values with change in Poles should be done away with to make the Ruling simple. Resultantly, this Directorate General decided to re-determine Customs Values of circuit breakers after a comprehensive exercise.

5. **Method adopted to determine Customs values:** Valuation methods given in Section 25 of the Customs Act, 1969 were followed to arrive at customs values of Circuit Breakers. Transaction value method provided in Section 25 (1) was found inapplicable owing to wide

variation in the values being declared to the customs. Identical / similar goods value methods provided in Section 25 (5) & (6) were examined for applicability to the valuation issue in the instant case which provided some reference values of the subject goods but the same could not be exclusively relied upon due to wide variation in declared values of subject goods. Thereafter, market enquiry as envisaged under section 25(7) of the Customs Act, 1969, was conducted. For the purpose, different markets were surveyed repeatedly. All the information so gathered was evaluated and analyzed for the purpose of determination of customs values. Consequently, the Customs values of Circuit Breakers have been determined under Section 25(7) of the Customs Act, 1969.

6. **Customs values for Circuit Breakers:** Circuit Breakers, hereinafter specified, shall be assessed to duty/taxes at the Customs Values mentioned below against them.
